

Adobe Acrobat Advanced Search

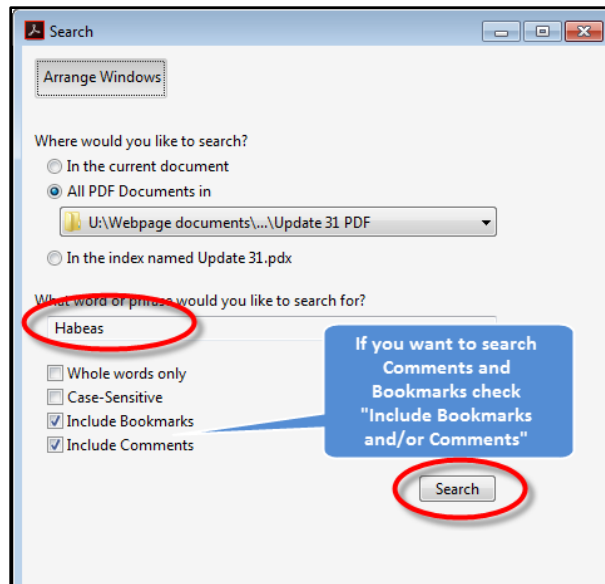

You can run a search across multiple PDF's using Adobe Acrobat's Advanced search. From the "Edit" menu, go to "Advanced Search".

In the Advanced Search window select "All PDF Documents in..." and then select "Browse for Location". Select the location of the PDF's you want to search and select "OK".

Enter the phrase or word you want to search for in the box. If you would like to include Bookmarks or Comments in your search, make sure one or both boxes are checked. To run the search, hit "Search".

The search results will show in the search window. You can expand each document in the search window to see how many times the term appears within the document. The search term is shown in context to the text around it. Clicking on the Document name will open the PDF to the first match in the document. Clicking on the search term will take you directly to the page where the search term appears. Click on the next term to go to the next match within the document. You will see the search term highlighted within the PDF.
